Alongside
Drop in. Hang out.

For schools & organizations
dropinalongside.com

PRIVATE, ANONYMOUS ROOMS

A calm place for your community to drop in

Alongside is a drop-in friendship website. People join live voice or video "tables" while doing everyday things, like studying, cooking or having coffee. Your organization can run its own private rooms where only your members can join, each under a random name.

Universities · Counseling centers · Residence halls · Student clubs · Workplaces & ERGs · Support groups · Libraries · Community centers

How it works for your organization

📱 No app to download
Works in the browser on any phone or laptop. Members scan a QR code to join.

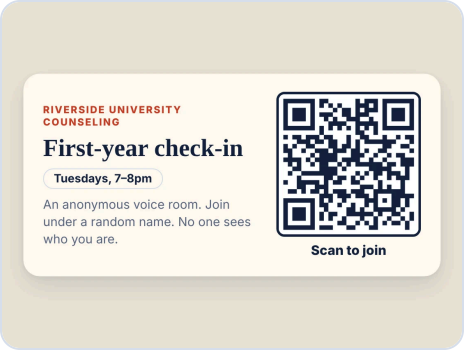

🎓 Only your members
People confirm with your school or work email. The email is never shown to the room.

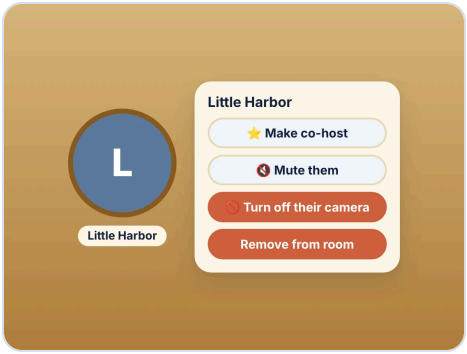

🙈 Anonymous by design
Everyone appears under a random name. Hosts see room names only.

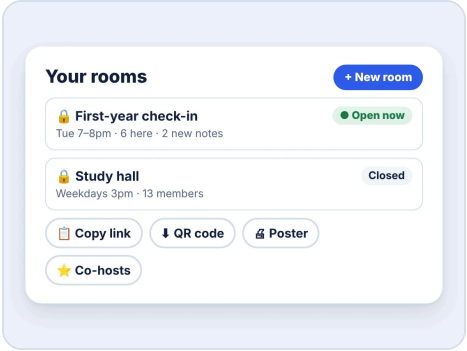

⭐ Hosts stay in charge
Rooms open on your schedule. Hosts can mute, turn off a camera or remove someone.

🛡 Safety tools
Instant camera blur, private notes to the host, and every safety lookup is logged.

☎️ Your support line
Add your own help line, and choose whether crisis lines show in your rooms.

How a pilot works

1
Tell us about your group
Who it's for and what you'd like the room to be.

2
We set it up with you
Your room, schedule, email ending, help line and QR poster.

3
Open the doors
Share the poster, host the first session, adjust as you go.

Alongside is peer support and belonging, not therapy, crisis or emergency care. Your organization decides how rooms are run and who hosts.
Public launch: Saturday, December 12, 2026.
